DETAILS OF PROPOSED PLAN OF WORK

This well is non-commercial in its present status. Because of nearness to bottom water it is impossible to deepen it. Therefore, to make a commercial flowing well from the oil bearing horizons penetrated, it is necessary to acidize the well. 2000 gallons 50% acid will be pumped into the tubing followed with sufficient oil to void tubing and hole of acid. A copy of this notice has been furnished the Proration Umpire, Lea County.
