(NOTE: Report results of multiple completion on Well
Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This confirms telecon Mueller/Brown November 17, 1967.

Drilled well to TD of 15721'. Left fish in hole consisting of crossover sub, 2-1/2" modified pin x 2-3/8" regular box x 1.32' long; two 3-1/8" drill collars; bottom hole reamer; and 4-1/2" bit, total 66' in length with top of fish at 15655'. Sample top of Devonian 15550'. Took DST 15560-15721' on top of fish. Recovered 1300' water blanket, 3800' very slightly gas cut drilling mud, 9671' black salty sulphur water. Ran Schlumberger logs. Spotted 100 sacks cement down drill pipe at 15655'. Checked top of cement at 14832'. Drilled cement to 15110' (196' of cement inside 5-1/2" liner). Pressure tested casing to 2250#, checked O.K. Plan to perforate and test the Morrow Sand section 13656-14138'. If test negative, will perforate and test Bone Spring section 11167-11224'.

18. I hereby certify that the foregoing is true and correct

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.
