

NEW MEXICO OIL CONSERVATION COMMISSION
WELL LOCATION AND ACREAGE DEDICATION PLAT

Form O-102
Supersedes O-128
Effective 1-1-65

All distances must be from the outer boundaries of the Section.

Operator Brunson & McKnight, Inc.			Lease R. F. Leggett		Well No. 1
Unit Letter H	Section 33	Township 21 South	Range 33 East	County Lea	
Actual Footage Location of Well: 1980 feet from the North line and 660 feet from the East line					
Ground Level Elev.	Producing Formation Y-2R		Pool WC	Dedicated Acreage	

1. Outline the acreage dedicated to the subject well by colored pencil or hachure marks on the plat below.
2. If more than one lease is dedicated to the well, outline each and identify the ownership thereof (both as to working interest and royalty).
3. If more than one lease of different ownership is dedicated to the well, have the interests of all owners been consolidated by communitization, unitization, force-pooling, etc?

☐ Yes ☐ No If answer is "yes," type of consolidation _____

If answer is "no," list the owners and tract descriptions which have actually been consolidated. (Use reverse side of this form if necessary.) _____

No allowable will be assigned to the well until all interests have been consolidated (by communitization, unitization, forced-pooling, or otherwise) or until a non-standard unit, eliminating such interests, has been approved by the Commission.

Sec. 33, T-21-S, R-33-E
Lea County, New Mexico

Gentlemen:

The following is a developmental plan for usage of the surface land and the drilling and completion of the captioned well.

1. The attached plat shows the existing roads and the proposed new road into the location.
2. There are currently no existing wells in the section where the proposed well is to be located.
3. The attached plat shows the layout and dimensions for the rig, pits and access road.
4. There are no existing tank batteries. If commercial production is found, a tank battery will be constructed on the location of the proposed well and no additional land will be used. All flow lines will be on this location also.
5. All water required for drilling will be hauled to the location by truck.
6. All waste materials will be disposed of in a proper manner. All trash, including lunch sacks, cans, etc., will be collected and buried. All scrap metal and wood will be collected and buried or hauled away. Any waste oil or brine will be hauled away or otherwise properly disposed of.
7. After drilling activities have ceased, the location will be cleared, the pits will be leveled, and the contours of the land restored as nearly as possible to their former condition.

Yours truly,

BRUNSON & McKNIGHT, INC.

Byron M. McKnight
