Attention: Mr. J. O. Ramey

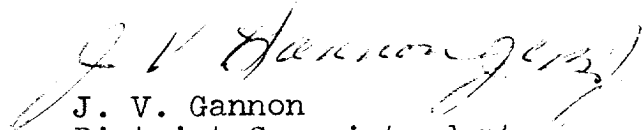

Gentlemen:

The above well was completed in the Morrow Zone with a maximum shut in tubing pressure of 4996 PSIG. The maximum rate the well flowed during clean up operations was 870 MCFD at 200 # WHP.

It is anticipated if a four point test were attempted, the flow rate at 20% pull down would be less than 50 MCFD.

In view of the above, TEXACO request this well be exempt from the open flow potential.

Yours very truly,

  
J. V. Gannon  
District Superintendent
