Mr. Bill LeMay New Mexico Oil Conservation Division P.O. Box 2088 Santa Fe, NM 87501

> RE: Commingling Production; M.L. Goins Lease Lea Co. NM

Dear Mr. LeMay,

We ask permission to commingle production from the M. L. Goins Lease which Kern Co. operates in Lea County New Mexico. The lease consists of four wells in Sec. 7, T-21S, R-37E, Unit letter designations being J, H, G, and I respectively. Wells 1, 2 and 3 are completed in the Eumont Yates, Seven Rivers, Queen Pool. The No. 4 well originally completed in the Drinkard is now producing from the Penrose Skelly Grayburg pool into its own battery. This is Fee acreage with royalty interests being the same in all four wells. With OCD approval, all wells will be produced to a single facility and production seperated by individual well tests (Current production attached). We have attached a sketch schematic of this facility which now handles production from wells 1, 2 and 3. Also enclosed, you will find a plat of the subject wells.

We write to you as directed by Jerry Sexton in Hobbs. In my conversation with Jerry this morning, I mentioned that combining production into a single facility would eliminate some of the possible failures and reduce maintainence costs significantly thus insuring continued production of these wells. Jerry indicated that he can grant permission for a period of 30 days, however, as some work may be required for one or both batteries in the next week or two, I hope to hear back from you very soon so we may direct any expenditures correctly.

## RECEIVIN SUN 07 1994 MGabs Contents
