

MULTI-POINT SURFACE USE AND OPERATIONS PLAN

UNION OIL COMPANY OF CALIFORNIA

HALFWAY FEDERAL WELL NO. 1

1980' FNL & 1980' FEL, Section 9, T-21-S, R-32-E

Lea County, New Mexico

This plan is submitted with the Application for Permit to drill the above described well. The purpose of the plan is to describe the location of the proposed well, the proposed construction activities and operations plan, the magnitude of necessary surface disturbance involved and the procedures to be followed in rehabilitating the surface after completion of the operation so that a complete appraisal can be made of the environmental effects associated with the operation.

1. EXISTING ROADS:

- A. Exhibit "A" is a portion of a highway map of Lea County, New Mexico showing the proposed well site 31 miles west of Eunice, New Mexico on State Highway No. 176.
- B. Exhibit "B" is a map showing all existing roads within a 3 mile radius of the well site and the planned access road.
- C. All existing oil field caliche roads and private ranch roads will be repaired as necessary. Repairs will consist of replacing the eroded caliche surface with a new caliche surface 6 inches deep and 12 feet wide, watered and compacted.

2. PLANNED ACCESS ROADS:

- A. Length and Width: The new road required will be 12 feet wide and approximately 5800 feet long.
- B. Surfacing Material: Six inches of caliche, watered, compacted and graded.
- C. Maximum Grade: 3 Percent.
- D. Turnouts: One each $\frac{1}{4}$ mile if needed.
- E. Drainage Design: New road will have a drop of 3-4 inches from center line on each side.
