Morrow Completion Reports

Dear Mr. Sexton:

This letter will confirm our discussion and your concurrence on October 12, 1979, in your office regarding Minerals, Inc.'s decision to produce the Morrow completion interval in the subject well through two parallel tubing strings due to the difference in bottom-hole pressures encountered during completion operations. Attached are the relevant completion reports and 4-point back pressure tests.

Please advise if additional information is required to complete your well file.

Very truly yours,

MINERALS, INC.

Al Klaar
