13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The objective of this procedure is to plug back from the Strawn and test the Bone Spring perforations, a small acid job and swabbing to determine fluid cut. If an oil cut is seen, the well will be fracture stimulated and production tested. If no oil cut is seen, the Bone Spring formation will be abandoned and a completion in Delaware will be attempted.
