

CONTINENTAL OIL COMPANY  
Blow-out Preventer Specifications

NOTE:

API SERIES 900

Manual and Hydraulic controls with closing unit no less than 75' from well head.  
Remote controls on rig floor.

DUE TO SUBSTRUCTURE CLEARANCE,  
HYDRILL MAY OR MAY NOT BE USED.

SURFACE USE PLAN  
Lockhart B No. 9  
Sec. 13, T-21S, R-36E  
Lea County, New Mexico

The plan is to accompany "Application for Permit to Drill" the subject well. The following is a discussion of pertinent information concerning possible effect which the proposed drilling of the well may have on the environment of the well and road sites and surrounding acreage. A copy will be posted on the derrick floor so all contractors and sub-contractors will be aware of all items of this plan.

1. EXISTING ROADS

- A. The proposed well site is 660' FWL and 1980' FSL, Section 13, T-21S, R-36E, Lea County, New Mexico.
- B. Exhibit A is a portion of a New Mexico road map showing existing roads. Directions to the location are as follows: From Monument, New Mexico, travel 8.5 miles south on State Road #8. This will bring you to a lease road 0.5 mile south of Oil Center. See Exhibit C for exact directions to location.
- C. Access roads are shown on Exhibits B and C.
- D. No improvement or maintenance is anticipated for the existing roads.

2. PLANNED ACCESS ROADS

- A. Width and Length: New road required will be 12' wide and 2000' long. This new road is labeled and coded on Exhibits B and C.
- B. Turnouts: Two
- C. Drainage Design: New road will have a drop of 6" from center line on each side.
- D. Culverts, Cuts and Fills: A six inch cut will be required 30' north of the stake.
- E. Surfacing Material: Six inches of caliche, bladed, watered and compacted.
- F. Gates, Cattleguards and Fences: None required.
- G. The proposed road is staked.

3. LOCATION OF EXISTING WELLS

See Exhibit C.
