Re: State K Gas Unit #3-S
Section 6, T21S, R36E
Eumont Gas

Gentlemen:

We have approved the above-referenced application for permit to drill since the well was at a standard location. However, you will need to request that NSP-1530 be amended to show the correct location of this well since it was issued for a well to be drilled 1650/S and 1980/W of Section 6. This will need to be done before the well can be produced.

Very truly yours,

OIL CONSERVATION DIVISION
