Re: State P #6-B  
Section 24, T21S. R34E

Gentlemen:

You indicate you plan to bring cement back to approximately 1600' or cover top of salt on your production casing. I had talked with Raymond and I thought you had planned to use enough cement to tack your production casing and come back later and tie it back. If you do not plan to do this, you will need to tie the cement back to the surface casing shoe.

I do not have a problem with either way, but please let me know which option you will use.

Very truly yours,

OIL CONSERVATION DIVISION
