Re: H.T. Mattern NCT-A #5-M
Sec. 24, T21S, R36E
Eumont Y-SR- Qn Pool

Gentlemen:

According to the test submitted on Form C-104 the above-referenced well has been completed as an oil well in the Eumont Pool. This well was proposed as a Eumont gas well as an infill well on an established 320-acre proration unit consisting of the S/2 Sec. 24, T21S, R36E, currently dedicated to the H. T. Mattern NCT-A #1-0.

We have assigned an oil allowable to the #5 well, but it will be necessary for you to request that NSP-152 be amended by the deletion of the 40 acres dedicated to the #5 oil well completion. Your gas allowable is being reduced to 280 acres and you will have 60 days in which to get NSP-152 amended.

— Please submit a 40-acre plat for #5 and a revised 280 acre plat for #1.

rec / Also, we are returning Form C-105 and request that you complete the lithology record on the back side of the form and return it to us.

If you have any questions, please contact Evelyn Downs at (505) 393-6161.

Very truly yours,

OIL CONSERVATION DIVISION
