

in Unit M of Section 24, T-21-S, R-36-E, has recently been completed as a Eumont oil well. This reduces the non-standard proration unit for Well No. 1 to 280-acres.

- 3) That Chevrons' H. T. Mattern (NCT-A) Well No. 2 located in Unit J of Section 24, T-21-S, R-36-E, has recently been approved by District N.M.O.C.D. for recompletion into the Eumont gas zone, and we wish to simultaneously dedicate this well with the H.T. Mattern (NCT-A) Well No. 1.

Attached is a plat outlining the proposed non-standard Gas Proration Unit, and a map showing all offset properties and wells.

In view of the facts submitted, Chevron U.S.A. Inc. requests that administrative approval of the amendment to Order NSP-152 and Simultaneous Dedication be granted. If further information is required, please contact myself or David Bohon at (915) 687-7246 or (915) 687-7148, respectively.

Very Truly Yours

Alan W. Bohling
