Re: Air Quality Site Determination

Dear Ms. Logan,

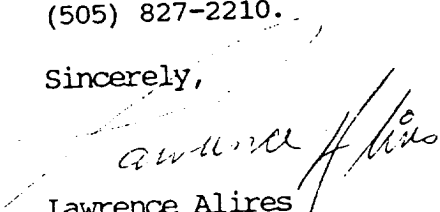

This letter acknowledges the receipt of your air quality site determination request dated September 27, 1994 to locate a portable natural gas compressor package within Lea County, New Mexico (Section 2, Township 22 South, Range 32 East).

Based on a preliminary review of the information provided we have determined that the potential uncontrolled emission rates will be less than ten (10) pounds per hour and/or twenty five (25) tons per year. Therefore in accordance with AQCR 702, a permit is not required.

Future changes or changes in the method of operation may constitute a modification and should be proceeded with an application for our review.

If you have any further comments or questions please call me in Santa Fe at (505) 827-2210.

Sincerely,

Lawrence Alires
Environmental Engineer
Air Pollution Control Bureau
