RE: Reclassification of Well
Eumont Pool
J.K. Rector #6-B Sec. 31, T21S, R36E

Gentlemen:

according to the recently submitted scheduled gas/oil ratio test the above-referenced well will be reclassified from an oil well to a gas well effective July 1, 1992.

If for some reason you feel this test does not reflect the proper classification of this well, please submit another test for our consideration by April 30, 1992.

If the well is to be reclassified to a gas well in the Eumont Pool you will need to submit a revised acreage dedication plat, Form C-102, dedicating 640 acres to this gas well or obtain approval of a non-standard gas proration unit. Also, if the gas transporter changes due to reclassification to a gas well you will need to file C-104 so indicating. Just a reminder that gas well gas must be separately metered. Also, the location 590/N & 1750/E will be unorthodox for a gas well since it is too close to the outer boundary.

If you have questions concerning the above, please contact Evelyn Downs at 393-6161.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton
