Santa Fe, New Mexico 87504

Dear Mr. LeMay:

Chevron U.S.A. is planning to drill and complete the **H.C. Collins #6** in the Eumont YTS-7RVRS-QN (Pro Gas) Pool. The proposed location for the well is 890' FNL and 1810' FWL in Section 14, T-21-S, R-36-E, Lea County, New Mexico.

The proposed well location is on an existing non-standard 320-acre Eumont gas spacing and proration unit (GPU) which comprises the E/2 W/2 and the W/2 E/2 of Section 14 of T-21-S, R-36-E according to Administrative Order NSP-182, dated August 30, 1955. The same order authorized the dedication of the H.C. Collins #4, located 1980' from the south and west lines of T-21-S, R-36-E, to the said non-standard GPU. We respectfully request that the production from the H.C. Collins #6 be simultaneously dedicated to the aforementioned GPU with the H.C. Collins #4.

Because the proposed location for the subject well is less than 660' from the west boundary and less than 990' from the north boundary of the said 320-acre GPU, we also request your approval for an unorthodox well location.

A copy of this administrative application is being provided to our offset operators via Certified Mail. Attached is a commercial map and a Form C-102 plat illustrating the proration unit acreage and well location. Also included is a copy of Administrative Order NSP-182 as well as copies of the letters to our offset operators.

July 16, 1993

If you have any questions, or if you require further information, please contact Richard Black at (915) 687-7284.

Sincerely,

F.S. Godbold
