RE: State DC Well No. 1 and State DC Well No. 3

Please accept the enclosed submittal for the most recent work performed on the State DC No. 3, which has been plugged back to the Drinkard zone following squeeze of the Abo perms (see form C-103). Following careful review of the data originally filed, it was discovered the top of the Abo was first reported inaccurately. For the accurate Abo formation top see form C-105.

Also, please consider this as a request for simultaneous acreage assignment of the referenced wells in the Drinkard Field.

Please feel free to call me at 915/498-8662, or email me at lclepper@titanexp.com should you wish for further information.

Thank you.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Laura Clepper', is written in dark ink.
