### DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

We propose to drill a 5150' Delaware sand test.

We plan to set approximately 330' of 8-5/8" surface casing with sufficient cement to circulate.

We will set a 4 1/2" oil string through the pay sand and cement it with 100 sacks.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
