DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to drill this well with rotary to a depth of approximately 5400 feet to test the Delaware Sand. We will set approximately 300 feet of 8-5/8" casing and cement to surface. If oil is encountered, 5[±]₂" casing will be set through pay and cemented with 200 sacks. Completion will be made through perforations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company William A. & Edward R. Hudson

Address 302 Carper Building

Artesia, New Mexico

By May

Title Consulting Engineer.
