13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Pronghorn Management requests a continuance of the T.A. status for the Marshall Federal No. 1 well are presently evaluating the feasibility of expanding the pressure maintenance project from the State "Dc" Lease southward into the Marshall and Fields Leases. The "Dc" No. 1 has recovered twice the reserves as have the non-pm wells.

Once a water source has been established, several of these wells will be converted to injectors. If this is satisfactory, we will set up to test the casing for mechanical integrity.

14. I hereby certify that the foregoing is true and correct
