(Field)	(Co	unty or Subdivision)	(State or Territory)	

The elevation of the derrick floor above sea level is 3707. ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cement-ing points, and all other important proposed work)

It is intended to drill a well at the above location with rotary tools to a depth of 5300' in the Delaware Sand. Casing will be comented in accordance with USGS regulations and other special requirements will be complied with.

The following easing program is planned: 8 5/8" OD 24# H-40 set at 350' w/175 sx; 4 1/2" OD 9.5# J-55 set at 5300' w/1000 ex. The 4 1/2" string will be set only if commercial production is encountered.

Verbal approval obtained from your Mr. Stanley by phone conversation with our Er. Lyon on September 6, 1961.
