FULL DETAILS OF PROPOSED PLAN OF WORK

(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

This well was drilled to a depth of 4352' and because of lost circulation and bad fishing jobs, it was considered uneconomical to drill to contract depth of 5000'. We now request permission to plug the well as follows:

Set a 15 sack neat cement plug in the bottom of the 9 5/8" casing at 1355', which was originally cemented with 150 sacks of cement. Then, recover as much of the 9 5/8" casing as possible and set a 10 sack plug in the top of the surface casing. Surface is 12 3/4" casing and was cemented from top to bottom at 460'. A monument will be put up.
