17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

On May 23rd and 24th the Oil Conservation Division conducted a mechanical integrity test on this well. Communication was discovered between the 5 1/2" casing and the 9 5/8" surface casing. Marathon proposes to locate the leak using a packer and bridge plug. Once located it will be squeezed under a retainer. An attempt will be made to circulate cement to the surface.

Notice will be given 24 hours prior to the start of this work.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
