Re: Classification Shipley #1-N
Section 27-22S-36E

Gentlemen:

A check of the file on your Shipley #1 shows that this well is being carried in the South Eunice pool as a gas well, although it should be properly be classified as a Jalmat gas well. In view of this fact, it will be necessary for you to file with our Santa Fe office an application for a non-standard gas proration unit.

We will continue to carry this well in the South Eunice pool until August 1st, which should give you sufficient time to apply for and receive the required order.

Yours very truly,

OIL CONSERVATION COMMISSION
