Re: Reclassification of State "A" A/C 1  
No. 63-I, Sec. 3, T-23-S, R-36-E &  
No. 78-G, Sec. 14, T-23-S, R-36-E  
Langlie Mattix Pool

Gentlemen:

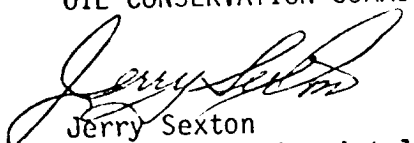

On July 22, 1977, we wrote to you regarding discrepancies between gas-oil ratios as reported on Form C-116 for the subject wells and actual producing gas-oil ratios taken from figures reported on Form C-115, and we asked that you check and advise as to which reports are correct.

Since your letter of August 9, 1977, pointed out only one error in production for Well No. 78, we assume that production reported on Form C-115 is correct. Therefore, the wells will be reclassified as oil wells in the Langlie Mattix Pool effective September 1, 1977, and oil allowables will be assigned as reported on the latest Form C-116, which was 2 barrels per day for Well No. 63 and 1 barrel per day for Well No. 78. If these allowables are not sufficient to cover oil production from the wells, they can be increased if gas-oil ratio tests reporting more accurate figures are submitted.

In the event that a change of transporter(s) occurs due to this reclassification, please submit Form C-104 designating the correct transporter(s).

Yours very truly,

OIL CONSERVATION COMMISSION

  
Jerry Sexton  
Supervisor, District 1
