

OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below.

Title

1. The first part of the document discusses the importance of maintaining accurate records of all transactions.

2. It also outlines the various methods used to collect and analyze data, including surveys, interviews, and focus groups.

3. The results of the study are presented in a series of tables and graphs, which show a clear trend towards increased participation in community activities.

4. Finally, the document concludes with a series of recommendations for future research and for the implementation of the findings.

5. The first recommendation is that more resources should be allocated to the collection and analysis of data.

6. The second recommendation is that more emphasis should be placed on the use of qualitative methods, such as interviews and focus groups.

7. The third recommendation is that more attention should be paid to the dissemination of the results of the study.

8. The fourth recommendation is that more efforts should be made to ensure the accuracy and reliability of the data.

9. The fifth recommendation is that more resources should be allocated to the implementation of the findings.

10. The sixth recommendation is that more emphasis should be placed on the use of quantitative methods, such as surveys and statistical analysis.

11. The seventh recommendation is that more attention should be paid to the dissemination of the results of the study.

12. The eighth recommendation is that more efforts should be made to ensure the accuracy and reliability of the data.
