(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Farney A-5 November 28, 19 58

Well No. 6 is located 1980 ft. from NK line and 1980 ft. from E line of sec. 5

SE/4 Section 5 23S 36E NMPS
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Jalmat Lea New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3481 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well (formerly Trebol Oil Company's Federal Farney No. 1) was completed 11-7-53 at TD 3860'. Elev. 3481' DF, DF 10', cas. pt. 5 1/2" at 3860', pay Seven Rivers 3820-60'. Well was subsequently plugged back to 3772' and intervals 3715-45' and 3752-67' were perforated w/4 shots per foot.

To restore this well to producing status it is proposed to plug back, perf. and test interval 3690-3715' in the Yates Formation for oil. If interval 3690-3715' proves nonproductive, Yates intervals 3444-62', 3472-90', 3494-3510', 3530-40' and 3562-90' are to be perforated w/2 jet shots per foot for gas.

Subsequent report, stating results obtained, will be submitted upon approval and completion of this work.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
