Formy A-5 No. 5

Albino, New Mexico August 12, 19 52

Well No. 5 is located 1900 ft. from N line and 220 ft. from E line of sec. 5

NE/4 Section 5 (1/4 Sec. and Sec. No.) 27S (Twp.) 36E (Range) 10N (Meridian)  
Cooperdale (Field) Lea (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is \_\_\_\_\_ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill a well with rotary tools at the above location to a depth of approximately 3800' unless commercial oil or gas production is encountered at a lesser depth. All casing points will be cemented in accordance with approved methods of the U. S. Geological Survey and any other requirements will be complied with.

It is proposed to use the following casing pattern: 10 3/4" casing to be set at approximately 250' and cemented with 250 sacks cement, cement to be circulated to surface; 5 1/2" casing to be set at approximately 3800' and cemented with 1465 sacks or as determined by survey and to be perforated opposite the pay section.

Approval to produce this well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Continental Oil Company

Address Box 127

Hobbs, New Mexico
