(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

June 23, 1953

Well No. 1-Y is located 890 ft. from N line and 2310 ft. from E line of sec. 5

E/2 of NW/4 (1/4 Sec. and Sec. No.) 23-S (Twp.) 16-E (Range)

Empire Oil Co (Field) Lee (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 3420 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill the above well to a total depth of 3700' and complete in the Yates formation in the approximate interval 3400' to 3700'. We propose to set 10-3/4" casing at 250' and cement with sufficient cement to fill the annular space from shoe to surface. We propose to run 7" casing to a depth of 3400' and cement from shoe to base of the salt and then place 200 sacks of cement through a Halliburton stage collar at the top of the salt. We propose to complete the well in the Yates formation as a gas well producing from open hole in the interval 3400' to 3700'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
