Re: State A A/c-1 #88-K  
Section 10, T23S, R36E  
Recompletion to Jalmat  
NSL-2727

Gentlemen:

The above-referenced well was recompleted from the Langlie Mattix to the Jalmat Pool but was non-productive according to test submitted on your C-105.

Should this well be worked over and become productive at a later date it will be necessary for you to have NSL-2727 amended to reflect the redesignation of the proration unit to be dedicated to this well since it lies within a larger unit defined by R-9073.

We are returning the C-104 since it is not necessary at this time.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton  
Supervisor, District I
