March 14, 1961

New Mexico Oil Conservation Commission  
Box 2045  
Hobbs, New Mexico

Attention Mr. Eric Engbrecht

Gentlemen:

Enclosed please find three (3) schematic diagrams of our King No. 1 gas-oil dual completion (Jalmat-Langlie Mattix) in Section 12-T23-R36E, Lea County, New Mexico. The corrective work done on this well was explained in detail on Form 103 previously submitted. As discussed over the telephone on March 13, 1961, the Colmonoy is a special metalized compound sprayed on the outside of the tubing primarily to withstand the abrasive sand cutting action which we have been experiencing over a twelve foot interval in the lower portion of the Jalmat Gas pay. The two inch tubing string is now full opening from top to bottom.

Very truly yours,

WESTERN NATURAL GAS COMPANY
