Re: Deliverability and Four
Point Back Pressure Test.

Oil Conservation Commission
P. O. Box 2045
Hobbs, New Mexico

Attn: Mr. Joe Ramey

Dear Mr. Ramey,

In reference to our King #1 originally completed as a Langlie-Mattix dry gas well, Unit L, Sec. 12, T-23S, R-36E, Lea County, New Mexico. We have recently recompleted this well behind 5" liner in the Langlie-Mattix Oil and Jalmat Gas. Since this gas is to be produced through the annulus, and in accordance with R-107, we hereby request permission to run a Four Point Back Pressure test on this well, and in doing so use the last point in this test for the Deliverability. If these tests indicate favorable results, then application for dual completion will be submitted.

Very truly yours,

WESTERN NATURAL GAS COMPANY

W. B. Scott
