Well No. **1** is located **1980** ft. from **N** line and **1980** ft. from **E** line of sec. **19**

SW/4 NE/4 **19** **23 S** **36 E** **NMPM**
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Wildcat **Lea** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well to an approximate total depth of 4000' to test the Yates-Seven Rivers formation. We will run approximately 300' of 10 3/4" casing and circulate cement to the surface. If production is encountered, we will run 5 1/2" casing and cement with 600 sax poxmix, 4% gel.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
