FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

Since this well has not produced commercial oil or gas for several years we propose to plug and abandon. A Baker retainer has been set at 3420' and the exposed formation squeezed with cement. We propose to fill the 5-1/2" with mud to 2800', set cement plug, and shoot off and recover the 5-1/2" pipe from that depth. The hole will then be filled with mud to 2700' and a cement plug put in the 7-5/8". The 7-5/8" will be shot off at 2575' and recovered. Hole will be filled to surface with mud and a 4" marker placed in concrete at surface. 301' of 10-3/4" will be left in place.
