Oil Conservation Commission
Box 871
Santa Fe, New Mexico

Dear Sir:

An error was made in the Commission office in regard to the allowable of Texas Pacific Coal and Oil Company's N. M. State "A" a/c-1 Wells #3, #4 and #6. All three of these wells are in the NW/4 of Section 21, Township 23 South, Range 36 East in the Jalco Gas Pool. When the gas well plats were originally filed, an 80 acre allowable was requested for Well #3 and a 40 acre allowable for each of the other two wells, a total of 160 acres. At a later date a corrected filing of the gas well plats was submitted to request unorthodox gas proration units for these wells and these cases are now pending before the Commission until a decision is reached in Case 673. Because of this corrected filing, Wells #3 and #4 were each allotted an 80 acre allowable and Well #6 a 40 acre allowable, a total of 200 acres. The wells in question will be assigned the allowable originally proposed pending the cases in regard to the application for the unorthodox gas proration units.

Very truly yours,

TEXAS PACIFIC COAL & OIL CO.

John Yuronka

John Yuronka,
District Engineer
