Well was shut-in during February, 1975 due to low production. Future disposition will be dependent upon results of pilot waterflood which is now in progress. Evaluation of the pilot flood will be complete by year end 1977.

Eppines 10/1/76

"The condition of the well is such as to prevent damage to the producing zone, migration of hydrocarbons or water, the contamination of fresh water or other natural resources, or the leakage of any substance at the surface."
