FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

It is proposed to plug and abandon the above well. The method to be used is as follows: Run tubing, pump well full of mud, then pump in cement to fill hole up to casing. Pull casing and knock off oil string and pull. If casing is knocked off below base of salt, a cement plug will be run at that point. Another cement plug will be run at the top of the salt. The surface pipe will be left in place and the required marker will be cemented in place at the surface. This well has been purchased from the Parker Drilling Company by E. G. Rodman, and the plugging operations will be under his blanket bond.
