

OIL CONSERVATION COMMISSION

HOBBS, NEW MEXICO

Nov. 1, 1957

Cities Service Oil Co.
Box 97
Hobbs, New Mex.

Gentlemen:

You are hereby notified that effective November 1, 1957 your Brunson "B" Well No. 3 in Unit M of Section 3, T-22-S, R-37-E, Tubb Gas Pool, is reclassified as an oil well and it will be removed from the Gas Proration Schedule.

This reclassification is being made under the provisions of Commission Order No. R-586-B which defines an oil well in the Tubb Gas Pool as one producing hydrocarbons possessing a gravity of 45° or less. According to From C-103 dated December 18, 1936 the gravity for this well is 36.1°.

Since this well is presently producing from both the Drinkard and Tubb formations, before an oil allowable can be assigned in the Tubb Gas Pool it will be necessary for you to apply for a hearing to approve an oil-oil dual completion, and until such time as this dual completion is approved, the Tubb zone must be shut in.

Yours very truly,

OIL CONSERVATION COMMISSION
