Re: Application to Dually Complete
Cities Service Oil Company's
Brunson "B" No. 6, Brunson Pool,
Lea County, New Mexico

Gentlemen:

By means of this application Cities Service Oil Company wishes to state the following:

1. That Cities Service Oil Company's Brunson "B" No. 6 is located 380' North of the South line and 330' East of the West line of Section 3-T22S-R37E, Lea County, New Mexico. That it was completed in the Granite Wash (Brunson Pool) on June 8, 1948, at a total depth of 7434 with 5½" casing cemented at 7374' and is currently producing as an oil well. That Cities Service Oil Company and Sinclair Oil & Gas Company have entered into a Gas Operators agreement in regard to the Southwest one-quarter section of Section 3-T22S-R37E Lea County, New Mexico.

2. That attached Exhibit "A" shows the location of said well and the surrounding wells and lease holders.

3. That applicant now desires to dually complete captioned well so as to produce oil from the Granite Wash (Brunson Pool) Formation through the tubing and gas from the Blinebry Formation through the casing-tubing annulus in the following manner:

- a. Perforate the 5½" casing approximately 5445' to 5720' opposite the Blinebry formation.
- b. Set a production type packer below these perforations at approximately 7300'.

4. That the manner and method of dually completing, which is shown in the attached diagramatic sketch marked Exhibit "B", is mechanically feasible and will prevent co-mingling of fluids from the two reservoirs.

5. That this well is located at an unorthodox gas location due to being less than 660' from an outer boundary of the tract, and copies of this application have been sent to all operators within a 1320' radius of the subject well as required by Rule 3 of Special Rules and Regulations for the Blinebry Gas Pool, Order R-610, Case No. 727.

6. That copies of this application have been sent to operators of all leases directly or diagonally offsetting the said Brunson "B" Lease of the applicant as Required by the New Mexico Oil Conservation Commission Rule 112-A for Dual Completions.

It is therefore respectfully requested that the Conservation Commission grant the applicant exception to Rule 2, Order R-610, Case No. 727, and permission to dually complete this well in accordance with the rules and regulations of the Commission.

Respectfully submitted,

CITIES SERVICE OIL COMPANY

JDA/eb
Attach.
