FULL DETAILS OF PROPOSED PLAN OF WORK
(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

This is a dually completed Drinkard-oil, Blinbry-gas well. The Drinkard on production test 1-3-61 pumped 4.82 BO x 1.38 BW in 24 hours. It is no longer economical to produce. We propose to permanently abandon the Drinkard formation by loading hole with fluid, dropping a standing valve in tubing in packer set at approximately 6370', pull tubing at safety joint above valve, set drillable bridge plug at approximately 6325' with wire line and cap with 20' cement. Approval of the above procedure is desired before dual completion in the Blinbry-Paddock is attempted.
