Attention: Mr. William J. LeMay - Director

Dear Mr. LeMay:

Chevron U.S.A. Inc. respectfully requests administrative approval for a reclassification of the Mark No. 8 well from a gas well to an oil well and the creation of a 40 acre standard oil proration unit.

Chevron U.S.A. recompleted the Mark No. 8 well from the Wantz Abo into the Blinebry Oil and Gas Pool on March 27, 1995. The location of the proposed new proration unit is the NW/4 NE/4, Section 3, T22S, R37E. Well No. 8 is located at 554' FNL and 1874' FEL in Section 3, T22S, R37E, Lea County, New Mexico.

An Administrative application for the Mark No. 8 was submitted on December 7, 1994. This application requested the classification of Mark No. 8 as a gas well, a 120 acre non-standard gas proration unit, and a non-standard gas well location and simultaneous dedication of Mark Nos. 7 and 11 with well No. 8. The application was approved January 31, 1995, (copy attached) under Administrative Order NSP-1716(SD)(L). This request is necessary since Well No. 8 turned out to be an oil well.

This will leave the Mark No. 8 as an oil well in a standard 40 acre oil proration unit and the Mark Nos. 7 and 11 as gas wells simultaneously dedicated to an 80 acre non-standard gas proration unit, located in the E/2 NE/4 of Section 3, T22S, R37E.

A copy of this administrative application is being provided to our offset operators via Certified Mail. Attached is a commercial map and a Form C-102 plat illustrating the proration unit acreage and well location. Also included is a copy of the letter sent to our offset operators.
