Santa Fe, New Mexico

## MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Collowing is a report on the work done and the results obtained under the heading noted above at the	or the Commission.	Indicate nature o	f report by checking be	elow:	
ALTERING CASING  EFFORT ON RESULT OF TEST OF CASING  Monument, New Mexico  EFFORT ON RESULT OF TEST OF CASING  Monument, New Mexico  Interest of the performance of the work done and the results obtained under the heading noted above at the american set of the company of Operator  Company of Operator  Company of Operator  Field,  More dates of this work were as follows:  Cottoc of intention to do the work was EMEXECT submitted on Form C-102 on November 16, 1937 19  Interest of the proposed plan was [was not] obtained. (Cross out incorrect words.)  DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED  10-3/4" 32.75# 8-Thd. New lapweld casing was set in this well at 307' and comented by the Halli-urton method with 500 sacks.  The cement was allowed to sand undisturbed for 72 hours The cement was then drout of the casing and the hole was bailed dry, and allowed to stand undisturbed for one hour. Tebbailer was then run to bottom again to determine if any water had accumulated. No water had accumulated so the drilling was then resumed.  Witnessed by Bill Hans  Two States Prilling Co.
