Re: Application to Dually Complete
Gulf Oil Corporation's Lee Stebbins
"B" No. 3, Tubb Gas and Drinkard
Oil Pools, Lea County, New Mexico.

Gentlemen:

By this letter of application, Gulf Oil Corporation wishes to state the following:

(a) That Gulf Oil Corporation's Lee Stebbins "B" No. 3 located 660' FNL and 460' FEL of Section 5-22S-37E, was completed 5-24-47 at a total depth of 6597'. The attached Exhibit "A" shows the location of this well on the Gulf Oil Corporation's Lee Stebbins "B" Lease together with the location of all offset wells. The attached Exhibit "B" shows a diagrammatic sketch of the proposed dual completion.

(b) That subject well has 7" casing set at 6500' and cemented with 700 sacks of cement. The well is an oil well producing from the open hole interval from 6500-6597' from the Drinkard (Vivian) formation in the Drinkard Pool.

(c) That the applicant proposes to dually complete the well in the following manner:

- (1) Perforate the 7" casing within the approximate intervals of 6050-6235' in the Tubb formation in the Tubb Gas Pool.
- (2) Set production type packer below these perforations at approximately 6450' to separate the two pay zones.
- (3) Produce the Drinkard Pool oil through the tubing and the Tubb gas through the tubing casing annulus.

(d) That the granting of this application for permission to produce the well as a dual completion with gas from the Tubb and oil from the Drinkard is in the interest of conservation and the protection of correlative rights.

(e) That the applicant will comply with all rules and regulations of the New Mexico Oil Conservation Commission to maintain separation of production from the two pay zones.
