

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

1. The first part of the document is a letter from the author to the reader, explaining the purpose of the study and the methods used. The letter is dated 1964 and is addressed to the reader. The author states that the purpose of the study is to determine the effect of the treatment on the response of the subjects. The methods used are described in detail, including the subjects, the treatment, and the response. The author also states that the study was conducted in a controlled environment and that the results are presented in the following sections.

1. Author: [Name of the author]

3. *How do you feel about the way you were treated?*

© 2000 Blackwell Science Ltd *Journal of Internal Medicine* 247: 395–402

[illegible]

As a result of the above, the following hypotheses were formulated:

11. DATE OF RECEIPT _____

Journal of Management Education 30(6)p.789-804

1990

[illegible]

It is not clear whether the above results are due to the fact that the β values are estimated from the same data as the α values, or whether they are due to the fact that the β values are estimated from the same data as the α values. The results suggest that the β values are estimated from the same data as the α values.

1. What is the purpose of the study? The purpose of the study is to determine the effect of the use of a mobile learning application on the learning outcomes of students in the field of computer science.
