PLANT INDUSTRY REPORT

The following report was prepared by the Bureau of Plant Industry, United States Department of Agriculture, for the purpose of providing information to the public regarding the results of the investigations conducted during the year 1917.

The Bureau of Plant Industry has been engaged in a series of investigations during the year 1917, with a view to determining the extent of the damage caused by the various plant diseases and insects which are known to be prevalent in the United States. The results of these investigations are here presented in the form of a report, which is intended to provide information to the public regarding the results of the investigations conducted during the year 1917.
