Date

OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the

Gulf Oil Corpn - Gypsy Prod Divn. H. T. Mattern "D" Well No. 1, 2 & 3 in
Company or Operator Lease

of Sec. _____, T. _____, R. _____, N. M. P. M., _____ Field,
Lea. _____ County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

The H. T. Mattern "D" Lease has three producing wells. Well #1 in the C NE SW of Section 6-22S-37E which is in the Penrose Pool. This well is produced into Tank Battery #1 which has two - 16' x 8' Wood tanks. Well #2 is located in the Center of SW/4 SW/4 NW/4 of Section 7-22S-37E. Well #3 is located in the Center of SW/4 SE/r NW/4 of Section 7-22S-37E. Wells #2 and 3 are located in the Arrowhead Pool and are produced into a tank battery of three - 12 x 12' steel tanks

Authority is requested to abandon and salvage tank battery #1, lay #1's flow line to tank battery #2 and produce #1 into the battery in which #2 and 3 are produced. We propose to set a test Separator at TB #2, lay a test line to the battery so that individual wells may be tested.

By making this consolidation we will be able to salvage two - 16' x 8' wood tanks, save labor and automotive equipment in maintenance and operation.
