(Meridian)ARROWHEAD  
(Field)Lee  
(County or Subdivision)New Mexico  
(State or Territory)The elevation of the derrick floor above sea level is 3459 ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to acidize with 1,000 gallons acid through perforations at 3690' to 3722'. Total depth of this well is 3724'.

Production from this well is now 4 BOPD and this work is being done in an effort to increase production.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
