Re: Change in pool designation for
undesignated wells

Box 1685

Hobbs, New Mexico

Gentlemen:

In accordance with the provisions of Commission Order No. R 800,
your Downes #3-B 6-22-37 which is cur-
Lease Well No. S-T-R
rently listed in the undesignated section of the oil proration schedule, will
appear in the Eumont pool in the
July proration schedule.

Yours very truly,

OIL CONSERVATION COMMISSION

~~XXXXXXXXXXXX~~ R. F. Montgomery
Proration Manager

Figure 1. A diagram showing a central point with several lines radiating outwards, possibly representing a network or a star topology.

The diagram illustrates a central point connected to multiple peripheral nodes, forming a star network topology. This configuration is commonly used in computer networks for its simplicity and ease of management. The central point acts as a hub, and the peripheral nodes are connected to it via individual lines, ensuring that each node can communicate with the central hub.

The diagram shows a central point connected to multiple peripheral nodes, forming a star network topology. This configuration is commonly used in computer networks for its simplicity and ease of management. The central point acts as a hub, and the peripheral nodes are connected to it via individual lines, ensuring that each node can communicate with the central hub. The diagram is a clear representation of a star network, where the central node is the only point of connection for all other nodes in the network.
