Re: Application for Dual Completion,
C. P. Falby "b" Well No. 1, Drinkard
and Eumont (Oil) Pools, Lea County,
New Mexico

Attention: Mr. A. L. Porter, Jr.

Gentlemen:

Attached is Texaco's Application for Dual Completion (Conventional) for the C. P. Falby "b" Well No. 1 located 1980' FSL and 1980' FWL Section 8, T-22-S, R-37-E, Lea County, New Mexico. Texaco plans to abandon the present producing Penrose-Skelly, deepen to the Drinkard formation and dually complete as a Drinkard and Eumont (Oil) dual. A 4-1/2 inch liner will be used to segregate the Penrose-Skelly formation and initiate production from the Drinkard formation. It is anticipated that both zones will be oil completions and will flow initially. Approval has been granted previously by the New Mexico Oil Conservation Commission for these zones in other wells on the C. P. Falby "b" Lease.

Also attached is a copy of the plat showing the area immediately surrounding Texaco's C. P. Falby "b" Lease and a diagrammatic sketch of the proposed dual completion. It is respectfully requested that TEXACO Inc. be granted administrative approval for this Application as provided for under Rule 112-A.

Yours very truly,

J. G. Blevins, Jr.

J. G. Blevins, Jr.
Assistant District Superintendent
