OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico

Gentlemen:

Following is a notice of intention to do certain work as described below at the

Stanolind Oil and Gas Company L. E. Grizzell "A" Well No. **1** in **SW/4 NE/4**
 Company or Operator Lease
 of Sec. **8**, T. **22-S**, R. **37-E**, N. M. P. M., **Penrose-Skelly** Field.
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

Well is presently completed in the Penrose-Skelly Field at a total depth of 3739'. Production has declined to an average of approximately 3 barrels oil and 3 barrels water per day.

Since Bradford and Zachary obtained a top allowable Drinkard well offsetting the subject well directly north, it is planned to deepen our L. E. Grizzell "A" No. 1 with rotary tools to approximately 6580' to test the Drinkard.

We propose to use the following strings of casing and to land or cement them as indicated.

Elevation - 3427' D.F.

Size Hole	Size Csg.	Depth	Cement	Remarks
	10-3/4"	294'	200 sx.	Installed
	7"	3425'	300 sx.	Installed (over)

Approved DEC 19 1950, 19.....
 except at follows:

 Title Field Engineer

<u>Size Hole</u>	<u>Size Casing</u>	<u>Depth</u>	<u>Cement</u>	<u>R e m a r k s</u>
6-1/4	5"	6400'	250 sx.	*

*In the event the 7" casing is found to be satisfactory by pressure tests, it is planned to install the 5" as a liner from 3365' to 6400'. If 7" is not satisfactory, 5" will be run from surface to 6400'.

All regulations of the New Mexico Oil Conservation Commission will be strictly adhered to.
